Investing in Serbia. An overview of the current tax system.

The current developments within Central and Eastern European countries are accompanied by ongoing changes in tax systems. For investors, this means numerous new developments to take into account

TPA's CEE Country Series covers 12 Central and South Eastern European countries, and gives an overview of the business environment and the most important new developments, including:

- Different types of business organisations, and their most important features
- Key details of corporate and personal income tax and VAT in each country
- Current tax allowances, reliefs and concessions
- Core provisions of double taxation agreements

In the TPA-Country Series there are booklets on Albania, Austria, Bulgaria, Croatia, the Czech Republic, Hungary, Montenegro, Poland, Romania, Serbia, Slovakia and Slovenia. Visit our website www.tpa-group.com, for detailed information and updates, or subscribe to our electronic newsletter at service@tpa-group.com

The information in these folders is based on the present legal situation and current administrative practice, and is therefore subject to change. The information is general in nature, and of necessity abridged: the booklets are not a substitute for individual, specific advice.

Our CEE experts will be happy to answer your questions in more detail.

Double taxation agreements

The right to taxation in the event of sale of shares in real estate companies is subject to differing provisions. In accordance with the OECD Model Agreement, for those countries for which there is a "yes" in the real estate clause column, the right to taxation lies not with the country of residence of the vendor but with the country in which the property is situated.
